

Western Oregon Advanced Health

Issued 8/17/16

WOAH BLAST # 12 **Tobacco Cessation** **Changes**

New updates to the WOAHA formulary!! Nicotine Patches, Gum, and Lozenges are now available without a PA for up to 90 days of therapy and 2 quit attempts per year. Participation in tobacco cessation classes is encouraged, but is no longer required before filling these tobacco cessation aids.

Bupropion SR 150 mg is available through the DMAP formulary as part of the mental health carve out without a PA.

Chantix requires a prior authorization and attendance of tobacco cessation course within the last 3 months.

Participation in tobacco cessation classes is strongly encouraged, as this increases the likelihood of successfully quitting. Classes are available free of charge to all WOAHA members. See the WOAHA Website for class schedule and details at:
