

Due to recent changes to the drug use criteria; Advanced Health requires use of Avastin – Bevacizumab to be trialed and failed before we can approve the use of Aflibercept for our members.

This change will affect members *starting* the medication on or after 7/29/2023. Members already receiving treatment with Aflibercept will not be affected.

Please contact the Advanced Health Pharmacy at (541) 269-7400 option 2 with any questions or concerns.
