

Formulary Update

Effective April 1, 2023; Albuterol HFA will be limited to ONE inhaler per 30 days without a prior authorization.

***If your patient has asthma and needs more than 1 albuterol HFA inhaler per month, please consider changing to budesonide/formoterol, as it can be used as a rescue and a maintenance inhaler.

***If your patient has COPD and needs more than 1 albuterol inhaler, please consider starting Incruse Ellipta. If your patient is already on Incruse Ellipta and symptoms aren't managed, please consider submitting a prior authorization request for a combination inhaler.

Please find the attached list of the current formulary inhalers but as always, please refer to the website for the most up to date information in the future.

Please contact Advanced Health Pharmacy Team @ (541) 269-7400 option #2 with any questions.
